ICARE: BED GUIDE

The iCare homecare bed range makes a great addition to any home, with all the functions and features of a hospital bed, but the aesthetics of a traditional, at-home bed.

HEIGHT ADJUSTABLE HOMECARE BEDS

Height adjustable beds are ideal for those with limited mobility, to assist with getting in and out of the bed. In particular, raising the bed is helpful for individuals who are able to self-transfer into their wheelchair, or to achieve a semi-standing position. Height adjustable beds are also particularly useful for carers, allowing them to raise the bed to an ergonomic, safe working height, reducing their risk of injury. Lowering the bed's height to closer to the floor provides more security against falls, especially when paired with a padded crash mat.

NON-HEIGHT ADJUSTABLE HOMECARE BEDS

A non-height adjustable homecare bed is designed as a low-risk, extra mobility option. They are ideal for individuals who still have good strength and mobility, or who do not need a carer's assistance. They can also be paired next to a height-adjustable bed for partners.

iCARE HOMECARE BEDS

BED DIMENSIONS

PARTNER BED OPTION

Most iCare beds can be configured as a partner bed. This option eliminates the gap in the center of the bed, to provide a seamless sleep surface for two people.

MATTRESS OPTIONS

SOFT: IC25, 22.5cm mattress depth, visco elastic memory foam, 200kg SWL

MEDIUM: IC20, 20cm mattress depth, visco elastic memory foam, 200kg SWL

FIRM: IC15, 15cm mattress depth, visco elastic memory foam, 200kg SWL

LATEX: 18cm mattress depth, natural latex, 200kg SWL

COLOUR OPTIONS

THINGS TO CONSIDER WHEN PRESCRIBING A HOMECARE BED

Home Environment Considerations

ROOM DIMENSIONS

Consider the shape and dimensions of the room prior to selecting a bed size.

CIRCULATION SPACE

Will there be enough room to navigate around, approach and transfer onto the bed safely? Will there be room for other required equipment? e.g. hoists, bedside commode chairs, walker frames, wheelchairs.

LOCATION OF POWER POINT

Is this easily accessible for the bed?

POSITION OF THE BED

Where will the bed be positioned within the room?

CONFIGURATION OF PARTNER BED

If prescribing a partner bed, ensure you have configuration confirmed.
Which side does each partner sleep on?

**Sides are based on the perspective when lying in the bed*
